30 — Fontana’s Future
Vision Statement

Fontana is a modern city benefiting from rapid growth while preserving its hometown atmosphere.

Our City is unified by a strong sense of community and a common goal: to be second to none in achieving high standards of quality as we grow and develop. We take great pride in our safe and attractive residential neighborhoods, which are complemented by recreational and educational facilities, and diverse and growing employment opportunities. Our Downtown and Civic Center district is the lively, thriving heart of Fontana. Our whole City is served by a network of efficient roads and infrastructure that connects us into a complete community in which we can live, learn, work and enjoy the fullness of life that Fontana has to offer.

— Fontana General Plan, adopted by City Council, October 21, 2003
Our message is simple: We are Open for Business.

To us that means providing information regarding city services, listening to your suggestions, acting on your concerns, and solving problems. It also means participating in policy making on citywide issues as well as the livability of our neighborhoods. Fontana is a dynamic, thriving community that supports education, growth, safety, and a positive community fabric. This is all achieved through an eight step strategic plan:

1. To Create a Team
2. To Operate in a Business-like Manner
3. To Practice Sound Fiscal Management
4. To Promote Economic Development
5. To Improve Public Safety
6. To Invest in the City’s Infrastructure
7. To Concentrate on Intergovernmental Relations
8. To Increase Citizen Involvement

Our City is unified by a strong sense of community and a common goal: to be second to none in achieving high standards of quality as we grow and develop. We take great pride in our safe and attractive residential neighborhoods, which are complemented by recreational and educational facilities as well as diverse and growing employment opportunities. We are continuously working to create a community in which we can live, learn, work and enjoy all that Fontana has to offer.

### 2.8 Billion in Total Spending

Open for Business in Practice: I-10 Cherry / Citrus & I-15 Duncan Canyon Interchanges

In a collaborative effort, the City of Fontana, the County of San Bernardino, SANBAG and Caltrans are working to reconstruct the I-10 Citrus, I-10 Cherry Avenue Interchanges as well as the I-15 Duncan Canyon overpass. All three constructions project broke ground in 2012, with Citrus expected to be completed in the Spring of 2014, Cherry is expected to be completed in the Summer of 2014 and Duncan Canyon’s expected completion is in the Fall of 2014. These projects will make operational and safety improvements, as well as greatly reduce traffic congestion in the rapid growing City of Fontana. In the case of Duncan Canyon, this project once completed will also pave the way for over 1580 acres of approved specific plan development.

The bridge reconstruction across I-10 at Citrus and Cherry Avenues will achieve several transportation goals including:

— Updating inadequate infrastructure built in the early 1950s
— Improving traffic flow by providing a four-lane roadway as an alternative to drivers or pedestrians desiring to cross I-10
— Improving traffic flow at both Valley Boulevard & Slover Avenue
— Decreasing emergency response times for police, fire, and ambulance services
— Reducing pollution by allowing through traffic movement that reduces idling time, thereby reducing contaminants in the air

The Citrus and Cherry projects will replace the existing four and five-lane bridges over the I-10 with a seven and eight-lane bridge. The project will also widen the bridge over the railroad tracks from three and four-lanes to six and eight-lanes and make improvement to on-ramps and off-ramps. A new loop ramp will be added for traffic going northbound on Citrus Avenue to the westbound I-10. Intersection improvements will be made at the Citrus and Valley intersection, Cherry and Valley intersection, Cherry and Slover intersection, as well as other local street improvements to improve traffic flow.

After completing the final design the official ground breaking ceremony took place on October 12, 2012, thus marking the official start of the third interchange project in 2012. The Duncan Canyon Interchange at I-15 currently exists as a two-lane overcrossing which was constructed in 1976. The existing overpass will be widened and result in a six-lane interchange and will include on and off-ramps connecting to the I-15. Duncan Canyon will pave the way for over 1580 acres of approved specific plan development. Commercial and office centers built adjacent to the interchange will create more than 16,000 jobs in addition to the tens of thousands of jobs in the construction industry over the next 10-15 years. Creation of jobs will occur in various industries including office, industrial, warehouse, and retail.

All three of these interchange projects are vital to Fontana’s continued growth and role as a regional focal point for transportation and goods movement. The I-10 is the...
principal truck route from Los Angeles to points east, including Arizona, Texas, and the Gulf Coast. Reconstruction of the interchanges along the I-10 will substantially reduce delays and improve access to key logistics hubs and centers locally, regionally and domestically.

The I-15 Duncan Canyon route is just as important to Fontana’s growth, as this is deemed as our “window” into the City. Once developed this interchange will allow another primary point of access into and out of the City of Fontana and will foster additional commercial and residential development along our northwestern section of our City. Fontana is committed to being open for business and collaborating with the State, the County and other agency to ensure that our residents and visitors continue to receive a high standard for quality development throughout the City.
