Dear Mayor and Council:

According to the Mexican American Legal Defense and Educational Fund (MALDEF), All government entities must include required data, related to citizen voting age population (CVAP), and other relevant information required by state and federal law as part of city's district maps, in order to consider that data in preparing the draft maps. The Fair and Inclusive Redistricting for Municipalities and Political Subdivisions Act (FAIR MAPS Act), requires the city to comply with the federal Voting Rights Act of 1965 (VRA), and, to the extent practicable, keep communities of interest together. The FAIR MAPS Act also requires cities to include with each draft map "information on the total population, citizenship voting age population, and racial and ethnic characteristics of the citizenship voting age population of each proposed supervisorial district. If city maps only include total population data and fail to disclose CVAP data for any of the proposed districts, then the city fails to comply and can risk litigation. Without the CVAP data, broken down by racial and ethnic demographics, the public cannot evaluate whether the proposed maps comply with Section 2 of the VRA. Further, federal law is clear that in determining compliance under Section 2 of the VRA, "CVAP is the appropriate measure to use in determining whether an additional effective majority-minority district can be created." (Luna v. County of Kern). The current maps only contain total population data – there are no population percentages and no CVAP data included.

City of Fontana needs to comply with the current Voting Rights Act and Citizen Voting Age Population (CVAP) data, when drawing new lines and must commit to conduct public workshops with enough notice to include community members from each district. The city has until March 2022 to finalize maps and vote, therefore providing the City ample time to engage community members, if they choose to act responsibly. Recent Census and CVAP data shows that the county of San Bernardino has overwhelmingly had an increase in Latino population in the last ten years. The average is about 51%, whereas the City of Fontana has approximately 67% Latino population. Therefore when redrawing the lines each city district must at least comply with the 51% county latino population threshold for each district. The City of Fontana has neglected to discuss or consider establishing a redistricting community led commission like other major cities. For example the city of San Bernardino has implemented an advisory commission and the City of Riverside will establish theirs today.

The community requests that the City of Fontana establish an Independent Redistricting Commission formed of community members that represent each district of the city. For transparency purposes, community members are able to apply to be appointed to the commission and each council member can select the member that will best represent the community in a neutral manner.

Respectfully,  
Margaret Vollmer

To whom it may concern:

I'm interested in the proposed boundaries. As a resident of South Fontana, I want to make sure the redistricting is fair. The reality is in South Fontana we have all the warehouses and majority of the pollution. I do not want a representative that resides the north side or even central Fontana making decisions for my community. They will not actually have to deal with the trials of my community, and should not be able to make decisions for my community. Currently, the city council and mayor continue to vote in favor of the warehouses, yet they do not actually have to deal with the increased traffic, pollution and noise on a daily basis. They have people that speak in favor of the warehouses that again do not reside in the immediate area of the warehouses. This is a problem and I don't want anyone that doesn't live in the immediate area making decisions on our behalf. I understand gerrymandering and I am concerned this will be an opportunity for city officials to redistrict lines in their favor, and not in favor of the residents that actually live there. They've shown time and time again that they don't always take the residents' concerns into their decision making. I hope redistricting is equitable "dealing fairly and equally with all concerned"-Merriam Webster dictionary.

Concerned South Fontana Resident,  
Danielle Luna Pinedo
